

VINO RHM

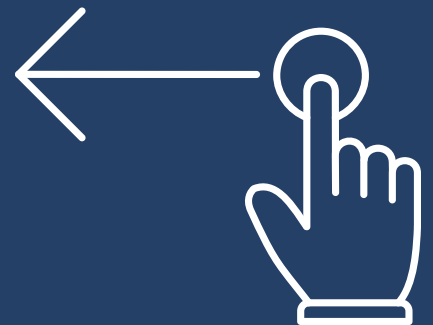

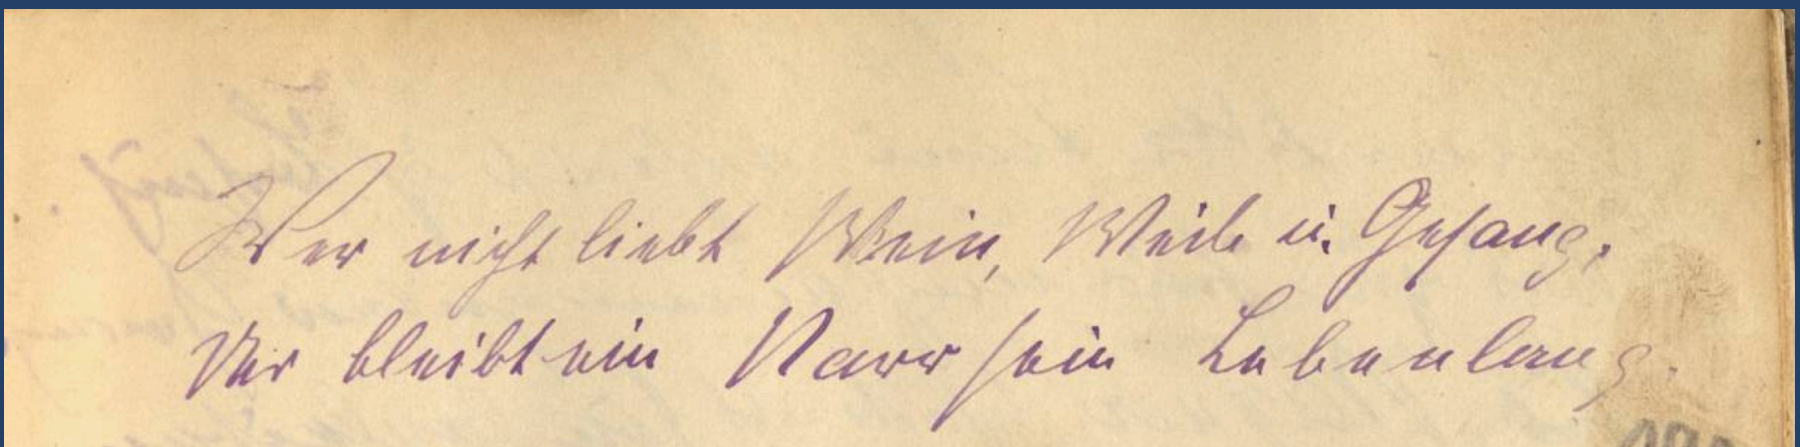

VISIBILIZING NORMATIVE REGIONAL
HISTORICAL MULTILINGUALISM

Project Website

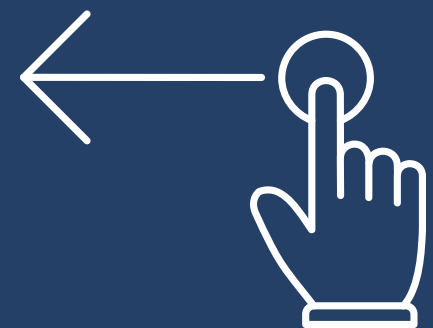

WHAT IS ViNoRHM?

The ViNoRHM project investigates linguistic diversity and multilingualism in the Duchy of Schleswig in the 19th century.

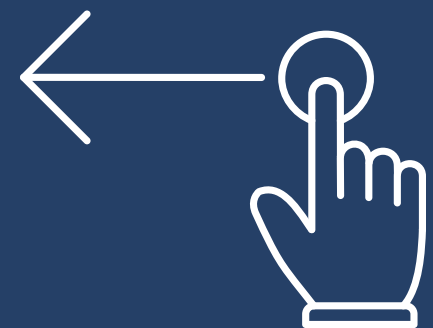

Through archival materials and private documents, the project aims to highlight the **language usage of groups or individuals, who were previously invisible** (or invisibilized), such as women or the lesser educated.

MAIN RESEARCH QUESTIONS

- Ideology: How do language ideologies influence speaker groups?
- Policy: Which top-down processes influenced language usage?
- Practice: When was which language spoken/written by whom?

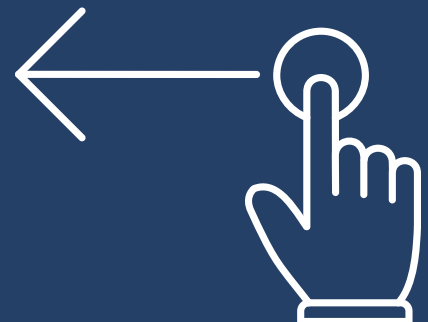

CALL FOR TEXTS

The ViNoRHM project is looking for **handwritten texts from 1789 to 1914** in the region of Schleswig-Holstein.

Do you have or do you know someone who could help?

Then feel free to contact the project staff here:
